DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-7 and 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hebestreit et al. (5,907,113) in view of Ito (5,578,775).

Hebestreit et al. disclose a musical instrument string, comprising a core and a polymer surface treatment adhered to a pre-selected portion of the surface of said core as discussed in the abstract, wherein said pre-selected portion is substantially the entire length of said core as discussed in the abstract and as seen in figures 2 and 4, wherein said polymer surface is PTFE as discussed in column 7, lines 19-67 and as recited in claims 1-8.

Hebestreit et al. do not disclose vapor or nucleated treatment.

However, Ito discloses a method vapor plating and ion (nucleation) plating as discussed in column 2, lines 62-65.

It would have been obvious to one of ordinary skill in the art at the time of the invention to utilize the teachings of Ito with the apparatus of Hebestreit et al., because Ito along with the teachings of Hebestreit et al., merely provide other ways of applying the polymer (PTFE) surface to the string.

Allowable Subject Matter

3. Claims 8-12 are allowed.

Response to Arguments

4. Applicant's arguments filed 11/26/2001 have been fully considered but they are not persuasive.

The applicant argues that there are no reasons to combine Hebestreit et al. and Ito. However, it is clear that references provide protecting the string of a stringed instrument by providing a coating to protect the string from contamination and etc... The fact that both provide a covering to a string or musical string, that along provides motivation to combine.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
